

The Kidz Matta range of safety surfacing brings a new and exciting concept to play areas where safe fall heights of up to 20 inches (500mm) are required. These lightweight tiles can be moved easily to allow an ever-changing atmosphere in your childcare centre.

A choice of two different mats, one with holes and one without, are all able to be interlocked and cater for different situations. Distributors can give advice which mat is best suited for a particular installation.

The combination of innovation design options and superior safety characteristics offered by The Kidz Mattas Safety Mat System provides the definitive solution to any childcare flooring requirement.

Kidz Mattas are quick to install, hard wearing and are a viable solution to most flooring requirements. The interlocked mats can easily be lifted or rolled up for cleaning or use elsewhere in other locations.

**5 Year
Kidz Mattas
Product
Guarantee**

When professionally fitted by Matta Products Ltd, Kidz Mattas carry a five year product guarantee.

Edge ramps

In most areas covered by Kidz Mattas an edge ramp will be required to give a safe and secure finish. The edges are available in matching or contrasting colors and add a pleasing finish to an installation. Where the Kidz Mattas are against a wall, edge ramps are not required.

**FALL
HEIGHT
tested**

Ergo Mattas provide a safe fall height of 20 inches (.5 metre) as NZS 4422:96

(Tested by the Centre for Sports Technology in accordance with BS EN 7188 : 1989)
